PERSONAL PROJECTS

E-VOTING SYSTEM USING BLOCKCHAIN (CURRENTLY WORKING)

- A blockchain-based voting system ensures secure, transparent, and tamper-proof elections by leveraging decentralized technology, which records and verifies each vote as a unique data transaction.

FASHIONUP - A FASHION-BASED RECOMMENDATION SYSTEM

- The purpose of our project is to give a fashion index to the person who appeared in clothing based on color theory, trends, and other attributes. The result will also have the suggestion of clothing preferable to that person concerned.

PRODUCT PRICE COMPARISON WEBSITE

- This project compared a product from different e-commerce websites and sorted it with lowest to highest price and other various filters on our website using HTML, CSS, and JavaScript.
